

Food and Ag Development Centers Beef to School Success Story

The project:

This project was developed to continue the efforts of getting Montana beef into local area schools. The Eastern Montana Food & Ag Development Center (FADC) created a liaison position in conjunction with Abundant Montana and AERO that would aid in communication between producers and schools. Thanks to funding made available through the Save the Children Fund received by Great Northern Development Corporation, schools received \$440 to purchase local beef for their students from regional producers who chose to participate in the project.

Total Schools involved: 19

Students Fed: 4028 (approximately)

Total Pounds Purchased: 1383.175

\$ put into our local economy: \$8,314.62
